

Technology Event

Wednesday 30th November 2022

RSVP ↗

Space is limited —
Please RSVP if you plan to attend

This technology event will cover educational sessions and demonstrations of a broad range of integrated CNI security technologies including video surveillance, specialist networks switches, access control, PIDS/perimeter detection, storage solutions as well as a CPNI approved PSIM solution. All sessions will be delivered by market leaders in their respective product class with a wealth of experience in delivering CNI projects.

In addition to this, there will be a number of special guest speakers with enlightening and supportive presentations.
