

RELEASE aeOS 2025.1

September 2025

AEOS 2025.1 introduces two new players to the scene. AEOS Frontdesk, the new and improved AEOS user interface with several enhancements to the user experience, and the launch of Nedap Mobile Access support for Google Wallet, making Nedap Mobile Access available for all your employees.

Nedap Mobile Access for Google Wallet

One solution for all devices with Apple Wallet and Google Wallet

- With the addition of Google Wallet support, Nedap Mobile Access becomes the leading mobile access solution in Europe.
- No matter what device you're carrying, you can access your spaces easily and securely anywhere, anytime.
- The Nedap Mobile Access app is a free app that can also now be downloaded in the Google Play Store.
- Alongside the Nedap Mobile Access app, there is an SDK that allows businesses to integrate with their own provisioning apps.
- The app is only needed to create the mobile pass and add it to Google Wallet.

Introducing AEOS Frontdesk for power users

Improved workflows and user experience

- Frontdesk is a freshly redesigned interface experience for receptionists, guards, and other daily power users. To name a few upgrades:
- The general search bar has been rebuilt. Among other things, filters and general search are now combined to improve performance and deliver the search results you're looking for.
- With Frontdesk, it's now possible to assign badges, groups, and any templates when creating or adding new people in the flow.
- There are also several improvements to how you can manage and view authorizations on a carrier level, but also in how you can manage and view badges/identifiers on a carrier level.

AEOS Upgrade Assurance

The easiest way to update your system to AEOS 2025.1, and stay updated, is to join our Upgrade Assurance programme. Please contact your Nedap representative for details.
