

RELEASE aeOS 2026.1

AEOS 2026.1 brings some powerful new features. A deep integration with Acre technology extends our intrusion solution while reducing complexity. We've increased functionality for our Traka key cabinet integration. And a new presence widget increases efficiency.

Acre intrusion integration

Seamless operation with specialised technology

- AEOS 2026.1 extends our intrusion solution through a deep integration with Acre technology.
- Acre's certified intrusion hardware is managed through AEOS and meets strict regulatory and insurance requirements.
- Helps you meet compliance standards confidently and reduces operational complexity.
- Create tailored intrusion workflows, increase efficiency and respond faster and with better context.

Presence widget in Frontdesk

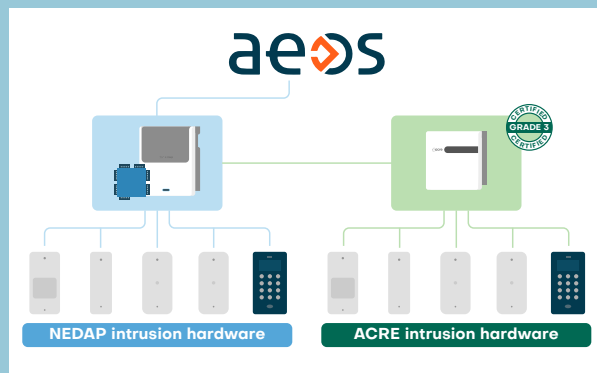

Real-time insight and clarity

- You can now see the number of people and vehicles in selected zones, instantly.
- Search quickly for presence and print or export the list.
- Easily see who is where and how they last used their identifier.

Traka: Item booking support

Improved convenience

- Authorised users can now reserve keys in advance for a specific time window.
- Streamlines the use of keys (e.g., for company cars) so they're available when needed.

AEOS Upgrade Assurance

The easiest way to update your system to AEOS 2026.1, and stay updated, is to join our Upgrade Assurance programme. Please contact your Nedap representative for details.
